## The Asian Summer Monsoon Chemical and Climate Impact Project

Airborne field campaign studying polluted air masses lofted by the Asian summer monsoon and their impacts on the global atmosphere

To be conducted July 15 – August 31, 2022 over the west Pacific with flight operations from Osan, South Korea

Principal Investigators:  
Laura Pan (NCAR/ACOM) &  
Paul Newman (NASA/GSFC)

Jointly sponsored by NSF and NASA
